Make time spent out of the office really count with Cypad software

mobility

Benefits of Mobile Computing

- ➊ Faster turnaround on jobs – more revenue & greater customer satisfaction
- ➋ More activities completed on-the-spot, less trips to site
- ➌ Better information flow – results captured on office systems and databases, as for office-bound tasks
- ➍ Avoid delay, errors and costs associated with office-bound data-entry typing
- ➎ Greater productivity from staff working out of office

Cypad provides your staff with the tools to operate effectively and efficiently when out and about, making sure your time in front of clients benefits both you and them to the maximum.

Mobile computing is too often associated solely with providing email and contact information when away from the office. Cypad software pushes mobility beyond this, offering the capability to assist and automate complete business processes involving out-of-office activities. Both making available necessary corporate information and enhancing the immediate interaction with the client.

We tailor our software exactly to the way in which your staff need and prefer to work.

Cypad's software range enables you to use the most appropriate mobile device, be it Tablet PC, Handheld or Smartphone – to gather, process create and access information out of the office – just as you expect to when in the office.

Cypad exploits recent developments in mobility hardware and software. Handhelds offer a remarkable price/performance ratio, Tablet PCs present the power and compatibility of a desktop PC in the crook of your arm, wireless data services have become ubiquitous. Microsoft's .Net and Web Services technology is today making it easier to create business applications readily tailored to fit a business's exact needs.

The Cypad approach

Cypad offers a wealth of experience in producing approachable, easy-to-use software. We believe that IT should meet the needs of the user not the other way around. This is realised by adopting simplicity, focusing on business needs, and rejecting technology for technology's sake. Cypad embraces the opportunity afforded by Tablet PCs and handhelds for making PCs truly personal and mobile.
